

MEDICATIONS TO STOP BEFORE SURGERY

10 DAYS before surgery you need to stop:

- Aspirin

7 DAYS before surgery you need to stop:

- Plavix
- Any anti-inflammatory medications, except Celebrex
 - Examples are: Advil, Aleve Voltaren, and Mobic
- Any herbal Supplements
- Vitamins (Vitamin E, K, etc.)

5 DAYS before surgery you need to stop:

- Coumadin
- Warfarin
- Pradaxa

3 DAYS before Surgery you need to stop:

- Xarelto
- Eliquis

You can continue to take the following medications:

- Tylenol (regular, extra strength, arthritis)
- Celebrex
- Ultracet
- Glucosamine Chondroitin
- Iron Supplements
- Ultram (Tramadol)
- Vitamin C

* Take a moment to speak with the medical doctor about your regular prescription medications (blood pressure, heart, cholesterol) and what effect they may have on your surgery.

** If you are having a second surgery, please refer to this list to stop the appropriate medications pre-operatively.

*** If you take a sleep aid currently, you may not take it on Oxycodone.
